

REINFORCEMENTS

Glass Reinforced Concrete. The Strength of Concrete. The Convenience of Plastic.

Issue 1, 2010

Sydney - Melbourne - Brisbane - Perth

www.mascotengineering.com.au

Welcome

2010 is a milestone year for Mascot Engineering because we're celebrating our 90th anniversary... to celebrate we've moved out of our long standing Regents Park building to bigger and better premises in Smithfield. More details in our front page feature story.

Last year was a tough year for many builders and contractors but the rumour-mill has it that things have improved considerably and the outlook is much more positive.

To make the most of it, remember, Mascot has a range of products and services to help you work smarter and improve your profit margin.

Just call us and discuss your needs or unusual challenges because we're sure to have a solution!

One of the most important reasons for producing this publication is to keep you up-to-date with developments in the world of drainage, electrical and industrial trade waste products.

If there is anything you'd like to know more about do feel welcome to call us.

Nick Taylor

PS - The Sydney move went so well, we decided to move in Perth too – see page 2 for details.

Celebrating 90 years – A very moving story

Mascot Engineering first opened its doors for business way back, slam-bang in the middle of some pretty tough times, including The Great Depression.

Now 90 years later we're sad to leave our old building which has been our home since the 1950s, but at the same time it's great to be in brand new premises.

New address

Our new Sydney address, phone & fax:

37 Tarlington Place, Smithfield NSW 2164

T: (02) 9828 2600

F: (02) 9828 2611

Our new Accounts Payable & Receivable contact details:

T: (02) 9828 2600 (option 2)

F: (02) 9828 2626

www.mascotengineering.com.au

Great central location

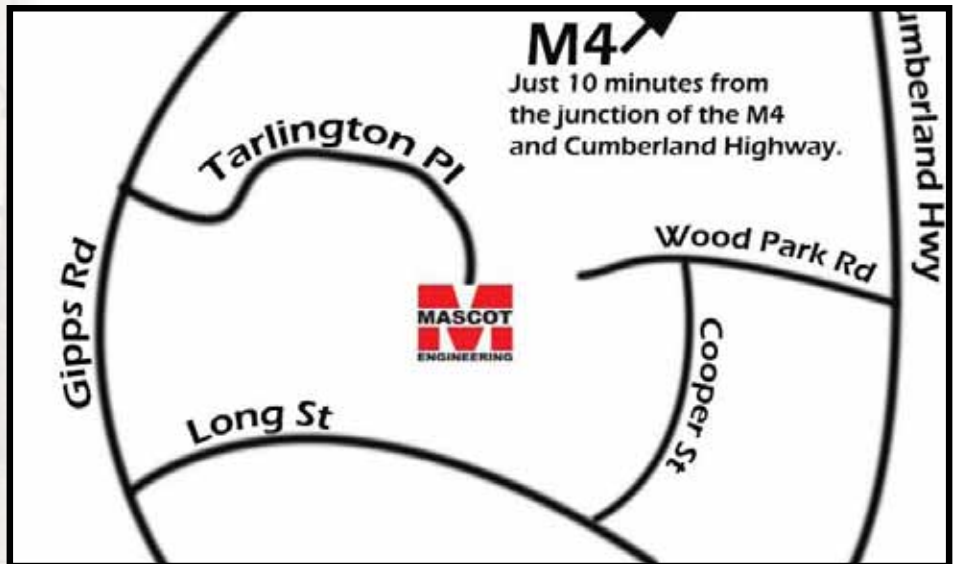

Our new head office for administration, sales, manufacturing and despatch is located in Smithfield.

It's a fantastic location because we're only 10 minutes from the M4 Cumberland Highway exit, which means getting product to anywhere in Sydney is quicker and easier.

Our new premises also mean increased production and larger stock holding

capabilities, so now you can have the products you want, when you want.

As well as our usual lightweight Glass Reinforced Concrete products, we now have stock of a larger range of Cast Iron Gastight Covers and Frames to suit all load ratings and have plenty of new products in the pipeline.

Central location means getting product to anywhere in Sydney is quick and easy

Visit us soon

An awful lot has changed in 90 years except the quality of our products and service. We look forward to seeing you at the new Smithfield location soon.

For more details call us on our new phone number :

(02) 9828 2600 or visit

Another moving story - Perth

The Sydney move went so well, we decided to move our Perth warehouse too!

As most of you in Western Australia know, our little warehouse in Malaga has been bursting at the seams with Dilution Pits, Grease Arrestors, Electrical Pits and Access Covers for a while now.

We've only moved a little further north to Landsdale - a brand new and much larger warehouse to ensure we have plenty of stock.

Our phone and fax numbers remain the same and we'll include a photo in the next issue.

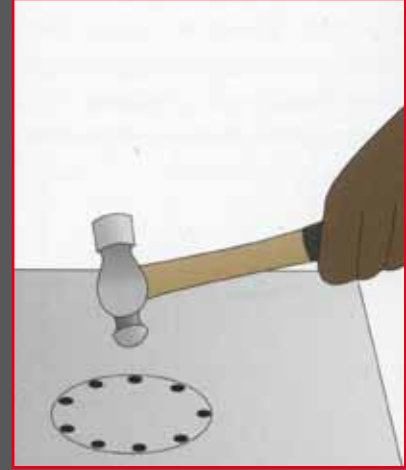

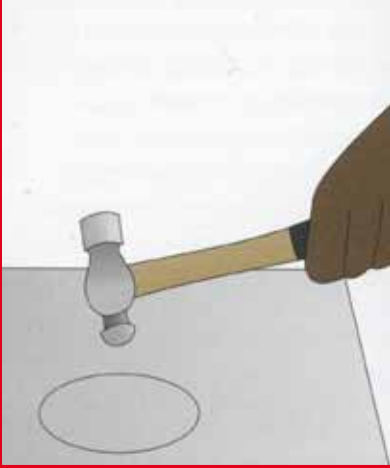

Mascot Engineering Perth
Unit 1, 10 Kalinga Way, Landsdale WA 6065

Conduit entries have never been so easy

GR Concrete pits don't have a knockout, leaving you to choose where the entries are to go as well as the size and number of entries on each side.

There's no need to 'stitch' drill. Simply mark out where the entry is to be made and starting in the centre, softly tap the pit with a ball pein hammer.

Alternatively, for larger entries (150mm), once you've marked out the hole required, use a masonry drill to drill at 50mm centres. Holes can also be formed using a grinder with masonry disc.

GMS Heelproof Grate & Frame

GMS Heelproof Drop-in Grate to suit all Mascot GRC Pits

GMS Heelproof Trench Grate & Frame

Cost effective heelproof grates are available off the shelf!

It used to be that when you required heelproof grates the only ones available were stainless steel.

Mascot has a cost effective alternative.

We manufacture a complete range of galvanised mild steel heel-proof grates that suit all our GRC pits.

These are drop-in grates sit flush with the top edge of the pit, making installation a breeze.

Our range of Heelguard GMS sump grates & frames go from 450sq, 600sq right up to 1200sq to suit both light and heavy duty uses.

We carry a full range of Heelguard GMS trench grates and frames in all popular sizes and load ratings.

For more information about Mascot GMS heelproof grates and frames contact our sales team on 1300 885 295.

Our in-house design team love a challenge

The Churinga Shopping Centre in Kilsyth, Victoria recently threw our in-house design team a challenge which they not only gladly accepted but also devised the perfect solution to the problem.

These photos show a custom-made product developed especially for Churinga Shopping Centre.

This project required a 5-part Class D cover and frame – it sounded relatively simple, then the part about it being supported only

on three sides was mentioned.

“OK” we said; “we’ll treat it like a multi-part cover and add a beam.”

Then we were told about the handrail that had to be incorporated. “Not a problem” said our design team as they raced back to their drawing boards!

Our design team love a challenge and they have never failed anyone yet, so when you need something out of the ordinary, throw them a challenge because we promise almost anything is possible.

Any suggestions?

If you have any ideas for products you’d like to see developed or suggestions for service offerings or thoughts on how we could do things better we’d love to hear about it.

Call our sales team on 1300 885 295 or drop us a line; news@mascoteng.com.au
