Welcome

Eighty five years is a long time. That's how long we've been a part of so many Australian industries including the plumbing and electrical industries.

In many ways we've grown up together, developing new products as our customers require them. Your needs become our products, and if we have to acquire expertise in new materials we're quick to take up the challenge.

This means we have good reasons to claim industry leadership; it also means that we know our products will stand the test of time. When you choose products that carry the big red 'M', you're choosing products you can trust.

Our pollution products are approved, tested, specified and/or used by the NSW Department of Commerce, Sydney Water, Department of Housing, Hunter District Water Board, Queensland Local Government Committee, ASSET services, and A.C.T. Electricity and Water, among many others.

Some of our products have been specifically designed and made for relevant bodies, such as our discharge control pit, electrical cable and conduit ducting - manufactured for such bodies as local councils and Energy Australia.

All we say is this. If you're considering a cheaper alternative to a Mascot Engineering product, be sure you make a comprehensive comparison including such details as weights, materials, installation and quality of finish.

It's always possible to save money. It's not as easy to save a reputation!

Nick Taylor

Introducing the new GRC DriveDrain

**Easy Drainage for any Driveway
Industrial - Commercial - Residential**

We proudly present our latest Mascot GRC product - DriveDrain 100 & 200.

Like all Mascot products the GRC DriveDrain is cost-effective and very practical. It offers the advantages of low weight for handling ease, yet is strong enough to stand up to industrial and commercial applications as well as residential.

This new drainage system is designed for ease of installation.

The trenches simply interlock together and end caps are available.

DriveDrain is available with a range of Galvanised Mild Steel Grates as standard to suit both heavy and light duty applications.

Custom Stainless Steel Heelproof grates are available for when aesthetics are paramount.

We'll also be adding traditional Cast Iron Grates in the coming months.

Solid top covers easy to install

Mascot has introduced a range of solid top cast iron covers that are lightweight and easy to install.

These drop-in covers have been specifically designed to drop into the rebate of our GRC Pits. The frame is attached to the pit with epoxy to hold it in place.

These covers bolt down and are fitted with standard lifting key holes for easy access.

They can also be supplied with brass marker plates if required.

The cast iron covers are watertight and are rated to Class C for pits up to 900sq and to Class B for the larger 1200sq.

We also manufacture traditional gastight cast iron in-fill covers as well as lightweight pedestrian duty GRC Covers.

Regardless of what type of cover you require for your next project, call the team at Mascot... we've got you covered!

GRC advice is yours free

Want to know about Mascot GRC products?

Mascot GRC is lightweight, impervious to moisture and easy to work with.

It's used in the manufacture of a wide range of products, including trade waste products and drainage and cable pits.

Mascot has been working with this material for 30 years and have acquired a considerable knowledge of the product.

Our range of GRC products is constantly growing and now includes the largest number of trade waste products authorised by Sydney Water.

All our products are designed with ease of use in mind, saving time and effort on-site for contractors.

We now have the largest stock holding of GRC drainage products in Australia, ensuring that you can get what you need when you need it.

We also have more experience with GRC than anyone else in Australia and will be happy to answer any questions you may have about this amazing material.

For more information call the sales team on (02) 9644 1044 or visit our website: mascotengineering.com.au

Mascot trade show hits the road

We're hitting the road in 2007 with the Master Plumbers Metro & Regional Trade Shows.

For the second year in a row, the NSW Master Plumbers Association has organised trade nights throughout the state.

These nights are informal get-togethers that give you the opportunity to talk face-to-face with our technical sales team and to see some of our new products.

Ask any questions you like and we'll give you the answers.

The shows are free with refreshments and finger food available.

If you would like more information just call our Sales Team on (02) 9644 1044.

SAME DAY SERVICE

We can supply most products the same day you place your order. Ring us when you need something from our extensive range and we'll get it to you FAST!

The largest range of authorised trade waste products

Mascot Engineering is the only company to have all of the following products authorised by Sydney Water:

- Grease Arrestors
- Oil Water Separators
- Averaging, Mixing, Dilution & Cooling Pits
- Basket/ Bucket Trap/ Arrestor
- Dry Arrestor Pit
- General Purpose Pit
- Silt Arrestor
- Solids Settlement Pit

This is why Mascot leads the way in trade waste. Regardless of the application, we are sure to have something to suit.

For more information about the complete range of authorised trade waste products call the experts at the Mascot Sales Team on (02) 9644 1044.

The extra mile...and then some

It started off as a normal order for a 2000L above ground Grease Arrestor. The plumber had warned us that there could be some issues with the site, so we were prepared for what might turn out to be a bit of a challenge.

The Grease Arrestor was to be installed in an underground car park. The first complication was that the only access was via a steeply-sloped driveway with minimal headroom. We modified the stand and attached wheels that would enable us to manoeuvre the tank onto the site.

The tank (complete with stand) was lowered onto the driveway from our truck. It was attached to the rear of the ute, lowered down the driveway into the carpark, and then moved into place.

No matter what issues you may have, consult the Mascot Sales Team and we'll work with you to find a solution. Even if it is a bit of a challenge!

GMS Heelproof Grate & Frame

**GMS Heelproof Drop-in Grate
to suit all Mascot GRC Pits**

GMS Heelproof Trench Grate & Frame

Cost effective heelproof grates are now available off the shelf!

It used to be that when you required heelproof grates the only ones available were stainless steel.

Mascot now has a cost effective alternative.

We now manufacture a complete range of galvanised mild steel heelproof grates that suit all our GRC pits.

These are drop-in grates sit flush with the top edge of the pit, making installation a breeze.

Our range of Heelguard GMS sump grates & frames go from 450sq, 600sq right up to 1200sq to suit both light and heavy duty uses.

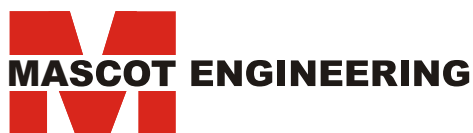

We carry a full range of Heelguard GMS trench grates and frames in all popular sizes and load ratings.

For more information about Mascot GMS heelproof grates and frames contact our sales team on (02) 9644 1044.

ORDERS FILLED - NO DELAY

Our large stockholding means that most products are in stock at all times, so call us first and get just what you want when you want it!
